TANG BAO KIEN (Mr.)

MIDDLE FRONTEND DEVELOPER

033-678-3302 | linkedin.com/in/kien-bao-057aa7267
baokien.tang@gmail.com | github.com/baokien2000

Profile

Middle Frontend Developer with **3.5+** years building production-grade web apps using **Next**.js and **React** — CMS, dashboards, and AI-integrated systems. Consistently achieved **90–100% Lighthouse** scores across multiple live products, with strong experience delivering pixel-perfect, high-performance UIs from **Figma** designs.

Skills

Frontend: Next.js, React, React Native, Vue, TypeScript, Tailwind CSS, Shadcn UI

State & Data: Zustand, React Query (TanStack)

Tools & Other: REST API, GraphQL, App Store / Google Play deployment, SEO Optimization, Performance Optimization, Figma

Familiar: Redux, Node.js, Firebase, MongoDB, PostgreSQL

Experience

DOLPHIN SOLUTIONS

Middle Front End Developer | Jan 2025 – Present

Primary Frontend Developer across multiple projects, owning UI implementation, component architecture, and API integration based on Figma designs.

Tech stack: Next.js, React, Shadcn UI, Zustand, TanStack Query, Tailwind CSS

❖ **Okuro Landing Page**

- Built an interactive map displaying partner hospitals and schools with location markers across Vietnam provinces.
- Implemented province-based search list synchronized with map markers, enabling auto-zoom and fly-to animations on selection.

Link: https://okuro.vn

❖ **IOC Dashboard | Intelligent Operations Center**

- Developed a choropleth map visualizing disease distribution across Vietnam provinces.
- Generated optimized PMTiles datasets from GeoJSON to improve map rendering performance and scalability.
- Built responsive dashboards with real-time charts for epidemic data monitoring.

❖ **EMR Landing Page**

- Achieved 90–100% Lighthouse scores across Performance, SEO, and Accessibility.
- Delivered responsive, cross-browser compatible UI based on Figma designs.

Link: https://gemr.vn/

❖ **GKIOSK | Hospital Queue & Payment Kiosk**

- Built a kiosk-optimized UI supporting queue ticketing, QR payments, service pricing, and user feedback.
- Deployed across multiple hospitals in Kiosk Mode on both Windows and Android environments.
- Supported configurable kiosk settings for multi-hospital deployment.

❖ **DSS | Digital Signature Statistics**

- Built a role-based platform (Admin & Customer) covering revenue tracking, signature analytics, billing statistics, and notifications.

WORLD CONNECT INVESTMENT & DEVELOPMENT TECHNOLOGY JSC

Fresher - Junior Full Stack Developer | Jan 2023 – Dec 2024

Contributed to building an AI-powered e-commerce ecosystem, focusing on frontend development and feature integration.

Tech stack: Next.js, TypeScript, Node.js, Firebase, Tailwind CSS, Zustand, React Query

❖ **POHO Ecosystem**

- Integrated GPT-powered chatbot and Midjourney image generation into the e-commerce platform.
- Implemented real-time notifications and live chat using Firebase.
- Set up GitHub Actions for automated deployment pipeline.
- Achieved 92–100% Lighthouse scores across Performance, SEO, and Accessibility.
- Built 3 interconnected platforms: POHO (marketplace), POHO Seller CMS, and POHO Admin CMS.

MGI PROPERTY TECHNOLOGY CORPORATION

Intern Front End Developer | Oct 2022 – Jan 2023

Contributed to frontend development of a real estate platform, implementing UI features based on Figma designs.

Tech stack: React, Next.js, Ant Design, Redux, Tailwind CSS

❖ **M86.LAND | Real Estate Platform**

- Built property detail pages displaying listing information, seller profiles, and specifications.
- Developed internal CMS features for property and content management.
- Implemented search filters and responsive layouts across the platform.

Freelance

FREELANCE React Native Developer | Jan 2026 – Present

Contracted to build a cross-platform POS mobile app for billiard venue management.

Tech stack: React Native, TypeScript, TanStack Query, Tailwind CSS, REST API

❖ **Minno Soft**

- Built a full-featured POS system including order management, and customer management.
- Implemented billing and revenue reporting dashboard for managers.
- Integrated Bluetooth/Wi-Fi thermal printer for in-app invoice printing.
- Handled end-to-end mobile delivery: development, build, and app store submission for both iOS and Android.

Side Projects

❖ **PORTFOLIO | Personal Portfolio Website**

Built a personal portfolio showcasing skills, projects, and experience with smooth animations..

Tech stack: Next.js, Tailwind CSS, Framer Motion

Link: https://tangbaokien.vercel.app/

❖ **KMOVIE | Movie Streaming Website**

- Built a high-performance movie browsing platform optimized for both mobile and desktop.
- Implemented OTP-based authentication, user profiles, commenting, and bookmarking.
- Integrated advanced search and filtering with SEO optimization.

Tech stack: Next.js, Node.js, MongoDB, Tailwind CSS, Zustand, React Query
